HAZEL PAN

Revenue Strategist & AI Automation Consultant

More Revenue. Lower Costs.

I help businesses grow revenue and reduce costs by building and improving sales funnels, using AI and optimizing workflows. I’m driven to find opportunities for 10x-100x ROI across the entire customer journey, from attracting leads to converting, nurturing and retaining customers.

SUMMARY

Revenue strategist and AI automation consultant with 7+ years scaling 7-9 figure businesses through data-driven campaign strategy and automations.

I don't just create “content”-I architect entire marketing systems. I start with organic growth to validate what resonates, then scale and automate with AI.

From there, I layer in email: cold outreach for acquisition, nurture sequences for retention, and sales campaigns that convert existing subscribers into buyers.

Finally, I amplify through paid advertising-with data to back every decision and systems built for scale. I've built and optimized funnels that generated 7 figures in tracked revenue while maximizing resources.

My edge: I see the full picture. Everything starts with organic validation, then email, then scales through paid ads-each channel feeding the next. I know which metrics matter at every stage and when to execute each channel depending on where the company is right now.
